- **Preschool Graduation** is Thursday, June 2nd!

APH Webinar on Kindergarten Readiness on Monday, May 9th

May 9, 2022, 1:00 – 2:30 PM EST

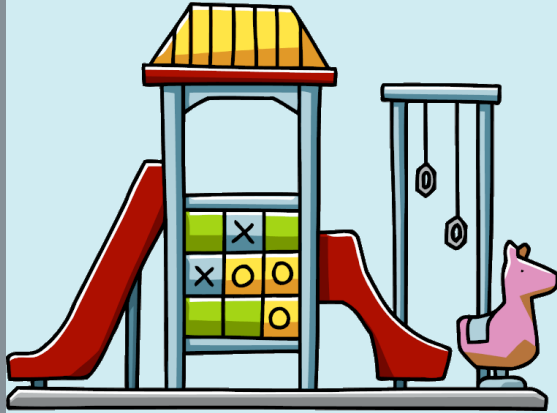

Ready, set, GO! Kindergarten Readiness for Children with Visual Impairments

Often kindergarten readiness concepts revolve around child developmental readiness skills necessary to be successful in kindergarten. However, these skills were normed on children without disabilities, specifically those with sight, and these readiness concepts are also often focused on the child only, excluding the system designed to educate them. Children who are blind or have low vision attend kindergarten too, have their own unique strengths, and require a classroom that is designed to meet their unique educational needs including curriculum accommodations or modifications in order for them to be successful in inclusive or special educational kindergarten settings. How do we get there? This webinar will introduce a comprehensive systems approach to kindergarten readiness through a research project to pilot a protocol to “ready” all aspects of a child’s world, which includes their

families and school, to assure their success at kindergarten.
