Activity: Nature Bracelets

Creative outlet for the whole family! Explore and create with many colors and textures while learning about the natural world.

Supplies: Duct tape or masking tape, assortment of natural materials *optional: magnifying glass and/ or flashlight.

Directions:

Step 1. Tape a piece of duct tape comfortably around your kids' wrists like a bracelet,

sticky side out.

Step 2. Take a walk outside together, and search for small leaves, acorns, flowers, and

other natural artifacts to adorn their bracelets. Use a magnifying glass and/ or

flash light to help with visual attention.

Step 3. While you're walking, look for birds, insects, and other wildlife. See how many

different kinds of trees you can count.

Learning Targets:

- Self Determination: I can make choices to create a bracelet.

- Sensory Efficiency: I can explore natural materials with my five senses.
- Career Education/ Pre-literacy & Science: I can develop a concept, label or make connections of natural materials.
- Orientation and Mobility: I can develop a concept of where to locate natural objects on a walk.
