Activity: Different Shapes Around the House

Description: Go around your house and find objects that have similar shapes. There are so many objects in my house that are circles, squares, rectangles etc. The more I looked around, the more I realized how many circle-shaped things I have in my home.

Target Areas: concept development, orientation and mobility, sensory efficiency

Below are examples of circle and square objects I found in my house. In my bathroom, alone, there were so many circular-shaped objects! Please take pictures of your shape scavenger hunt to share with me. I’d love to see the circles and squares in your house!
