**Activities: Three Different Activities are below**

[Mini Greenhouse: Starting Veggie Seeds at Home](#)

Start veggie seeds at home to transplant into your garden in 4 weeks while developing the concepts of where veggies come from and what they need to survive.

[Weather: What Do You Feel?](#)

Tiny gardeners will explore the sensory aspects of weather. They will experience what it is like to be a plant under different weather conditions and build vocabulary that will help them express what they are feeling.

[Exploring Weather with Technology](#)

Science intro to weather and seasons for young children and toddlers.
